

## **Environmental Policy**

Weldgrip is a subsidiary company of Acertec plc and consequently the board of Acertec plc take ultimate responsibility for the Environmental performance of the company.

This policy is applicable to the following operations:

- Weldgrip Geotechnical

Weldgrip is committed to conducting its activities in an environmentally responsible manner and recognizes the need to continually improve its operations and to prevent pollution where practicable, in order to reduce any adverse effect on the environment.

In order to achieve its overall objectives, including accreditation to BS EN ISO 14001: 2004, Weldgrip will endeavour to:

- Ensure compliance with environmental legislation, regulations and other applicable requirements.
- Identify and use materials/ processes that reduce the risk of pollution.
- Promote natural resource conservation by the efficient use of energy and the minimum use of raw materials.
- Minimise discharges, emissions and waste, and maximize recycling opportunities.
- Set annual environmental objectives and targets against which to measure improvements in environmental performance.
- Document procedures and continuously monitor progress in environmental performance through regular measurement, review and audit.
- Communicate this policy to all persons working for or on behalf of the organization.

This Policy will be made available to the public via the Weldgrip website.
